

BUG TRACKING PROJECT SUBMISSION

Shreecharana – PES1UG24CS917 – BPS61

Household Carbon Footprint & Target Tracker

This document presents the Bug Tracking project created for BPS61. The reported bugs cover calculation, validation, historical visualization, reduction-progress tracking, and access control.

Project: Bug_Tracking_BPS61

Project Key: BUG61

1. Reported Bugs – Jira Board

The Jira Bug Tracking board shows the reported bugs and their workflow status.

2. Bug Descriptions

BUG61-1 — Incorrect CO₂e Calculation

Description: The system calculates an incorrect monthly CO₂e value when valid electricity and transport consumption data is entered.

Expected Result: The system should calculate the monthly CO₂e value correctly.

Actual Result: The displayed CO₂e value is incorrect.

Priority: High

BUG61-2 — Invalid Consumption Value Accepted

Description: The system accepts invalid or negative household consumption values.

Expected Result: The system should reject the invalid value and display a validation message.

Actual Result: The invalid value is accepted.

Priority: High

BUG61-3 — Historical Carbon Footprint Graph Not Displayed

Description: The historical carbon-footprint comparison graph does not display correctly when historical emission data is available.

Expected Result: The historical CO₂e comparison graph should be displayed.

Actual Result: The historical graph is not displayed correctly.

Priority: Medium

BUG61-4 — Reduction Progress Calculated Incorrectly

Description: The system displays incorrect progress toward the household carbon-reduction target.

Expected Result: Progress should correspond to the recorded emissions and target.

Actual Result: The displayed reduction progress is incorrect.

Priority: High

BUG61-5 — Unauthorized User Can Access Household Data

Description: Household carbon-footprint and consumption information can be accessed without proper authorization.

Expected Result: The system should deny access to unauthorized users.

Actual Result: Household information is accessible without proper authorization.

Priority: Highest

3. Summary

Five bugs were reported in the Jira Bug Tracking project. Each bug is represented as a separate Jira work item for tracking and resolution.
